Address : No.518, Zhongchen Road, Songjiang District, Shanghai, China

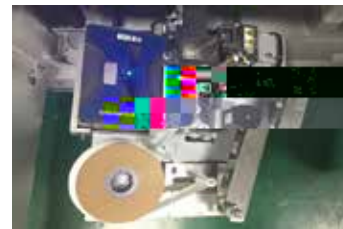

Rotating Cabinet: Automatically moves the medication cassette for replenishment to the medical staff by the shortest route with light prompts. It also boasts light sensors, halting rotation for safety upon detecting objects.

Intelligent Cassettes: Equipped with 348 intelligent cassettes of three types (S, M, and L), avoiding medication blockage with unique dispensing control technology.

DTA Trays: The two trays, each with 44 compartments, are designed for half and irregularly-shaped drugs, operating alternatively to enhance efficiency. In the case of off-machine drug replenishment, the DTA trays will automatically open, with medication information provided on the screen and replenishment lists printed.

Packaging and Printing: The packaging unit slides out for easy replacement of packaging paper and ink bags. The sealing temperature can be adjusted. Packaging dimensions are 70*70mm, with extended pouch lengths as needed.

12.1-Inch Color Touchscreen: Features a streamlined user interface with Chinese voice prompts, ensuring user-friendly operation.

Built-in Barcode Reader: Supports one-dimensional and two-dimensional barcodes, facilitating the process of medication verification.

■ UNI-DOSE PACKAGING MACHINE

General Healthy's Uni-Dose Packaging Machine automatically receives prescriptions from the Hospital Information System (HIS), and packages uni-dose tablets or capsules with pouches.
